SECTION 2 — CRITICAL BUGS [P0]

BUG-01**P0**</proposals/{id}>

'Edit' button routes to /mockup-editor instead of /proposals/{id}/edit

The 'Edit' button on every proposal detail page opens the wrong page — the mockup/canvas editor — instead of the actual content editor. The correct editor (/proposals/{id}/edit) exists and works, the button simply points to the wrong URL. Fix: Change the 'Edit' button href to /proposals/{id}/edit. Effort: 1h.

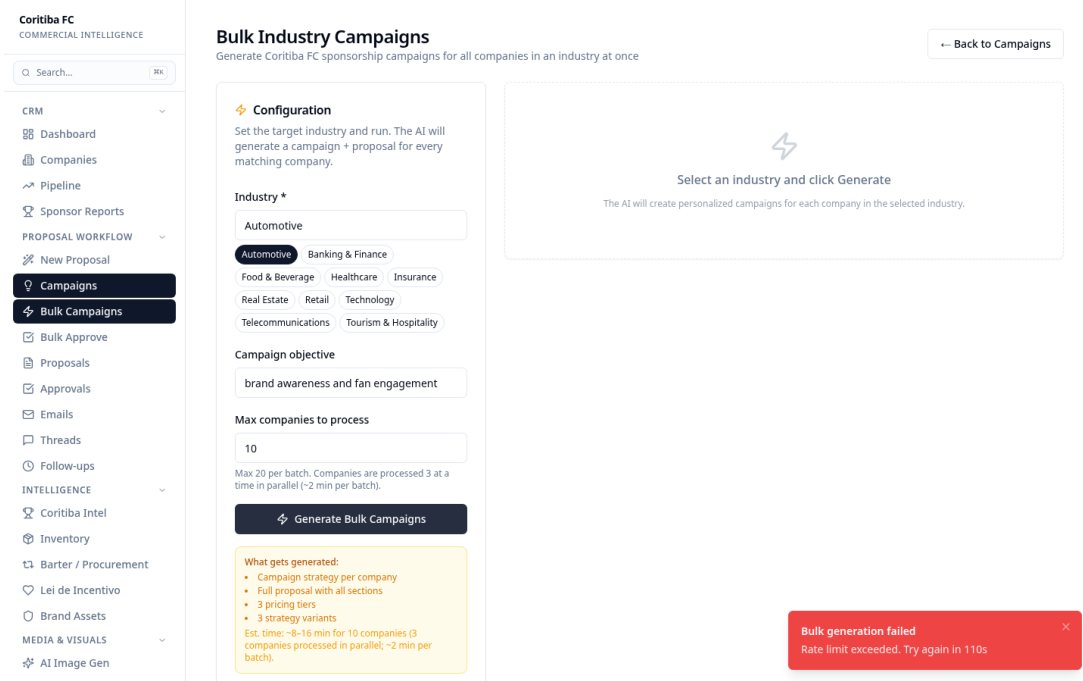

BUG-01: 'Edit' button opens mockup-editor (wrong). Real /edit page works when accessed directly.

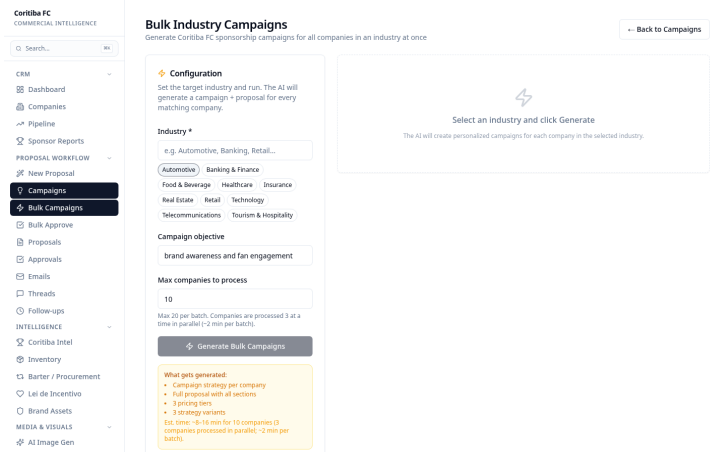

BUG-03**P0**</campaigns/bulk>

ALL 10 industry options fail — English labels vs. Portuguese database

The Bulk Campaigns form uses English industry labels ('Automotive', 'Food & Beverage'...) but the database stores values in Portuguese ('Automotivo', 'Bebidas / FMCG'...). Every option returns 'No active companies found' — 100% failure rate. Additional fix needed: Users must also be able to search for individual businesses by name, and either select an entire industry or cherry-pick specific companies from the list. Fix: Align form labels with DB values (or map EN→PT in the backend). Add individual company search + multi-select within industry results. Effort: 4h.

BUG-03: 'No active companies found' on all 10 industry options

BUG-03: Bulk Campaigns form — English labels vs. Portuguese DB

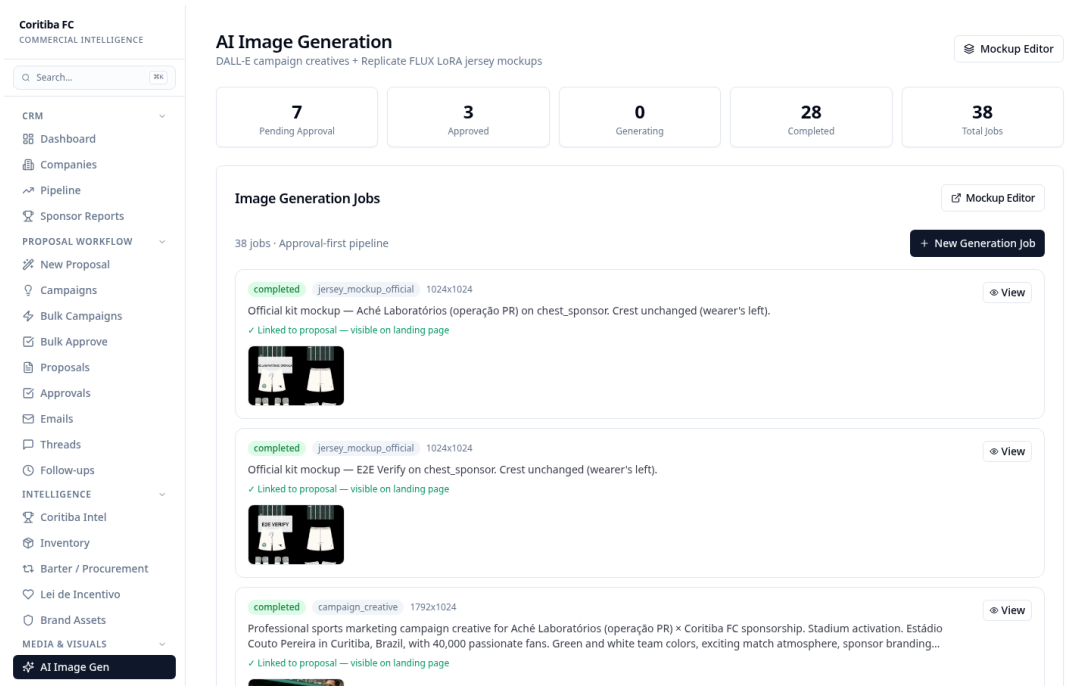

BUG-08

P0

/proposals/{id} — Visuals

'Generate Creatives' fires without showing the prompt — no control, no sorting

The 'Generate Creatives' button triggers image generation immediately with no prompt preview and no way to edit or cancel before it runs. 28 jobs are currently stuck in 'Generating'. What's needed: (1) show the prompt for each image before generation — user must confirm or edit it; (2) a dedicated image management view where all generated images can be easily sorted and filtered by proposal, campaign, or company. Fix: Add a prompt preview/edit modal per image before firing. Add filter/sort controls (by proposal, campaign, company) on the creatives management page. Effort: 5h.

BUG-08: 28 image generation jobs stuck — no prompt shown before generation

BUG-09

P0

/emails/{id}

[Nome] placeholder renders literally — sender name never injected

The email body contains the literal text '[Nome]' instead of the recipient's name. The team has 5-10 people sending emails — a sender profile database is needed with name, title, phone, photo, LinkedIn, and company assignment per member. Fix: Implement {{name}}, {{company}}, {{sender_name}} injection at send time from contacts and team tables. Effort: 2h.

Coritiba FC × Ambev Brasil — Patrocínio Master de Cerveja no Couto Pereira

Pending Approval

To charles.kielmanowicz@ambev.com.br · from adminkyma549@gmail.com · last updated Jun 01, 2026, 05:42 PM

Email body

Olá, Charles.

Futebol e cerveja compartilham o mesmo ritual — e o Couto Pereira é onde esse ritual acontece com mais intensidade no Paraná.

O Coritiba FC, clube centenário e o mais tradicional do estado, tem uma posição exclusiva disponível: o patrocínio master de cerveja. Estamos convidando a Ambev Brasil a ocupar esse espaço antes que ele seja preenchido.

O que está na mesa:
— Visibilidade premium no Couto Pereira e em todos os canais do clube
— Ativação de marca junto a uma das torcidas mais fiéis do Brasil
— Plataforma emocional única no mercado esportivo do Sul do país

Preparamos uma proposta completa — “Verde e Branco de Copo na Mão” — detalhando os ativos, o alcance e o potencial comercial dessa parceria.

Podemos agendar 30 minutos esta semana para apresentá-la?

Atenciosamente,
Departamento Comercial
Coritiba Foot Ball Club

Verde e Branco de Copo na Mão: Ambev Brasil × Coritiba FC — Proposta de Patrocínio Master de Cerveja no Couto Pereira

BUG-09: Email showing literal '[Nome]' placeholder

Confidential — Internal Use Only

Page 7

Prepared by Perplexity Computer

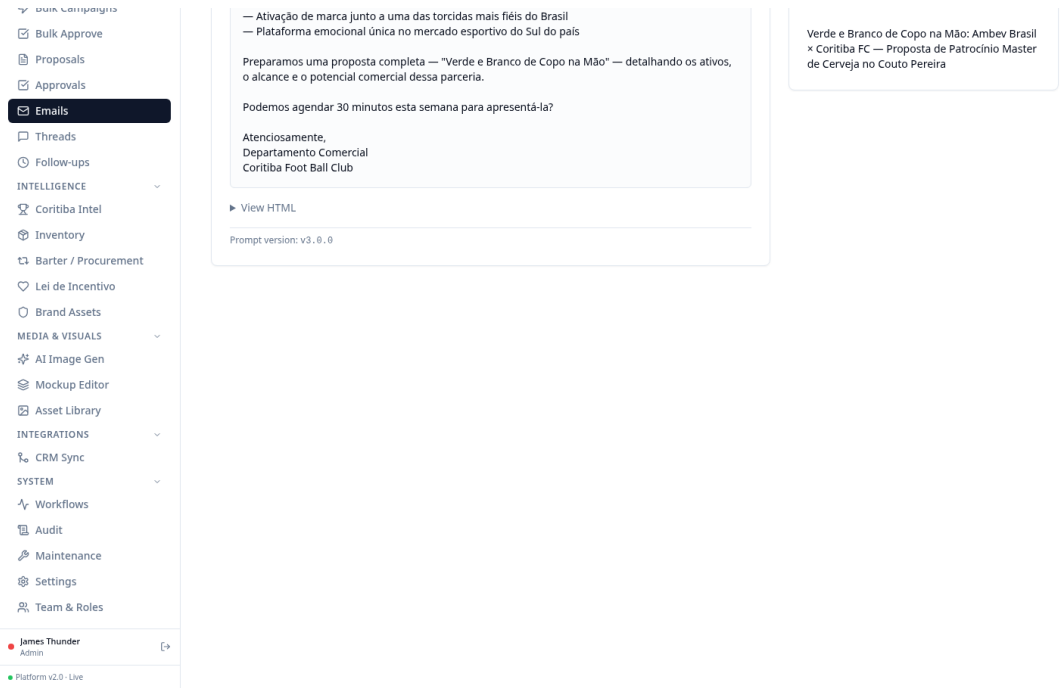

BUG-10

P0

/emails/{id}

No proposal link in email body — and no images

The email HTML contains zero links. There is no 'View Proposal' button or URL anywhere in the body, and no images. The sponsor receives the email with no way to reach the proposal. Fix: Add a mandatory CTA block with a 'View Proposal' link pointing to the public /view URL. Add support for embedded images in the email body. Effort: 2h.

BUG-10: Email HTML — zero links, no images, no CTA

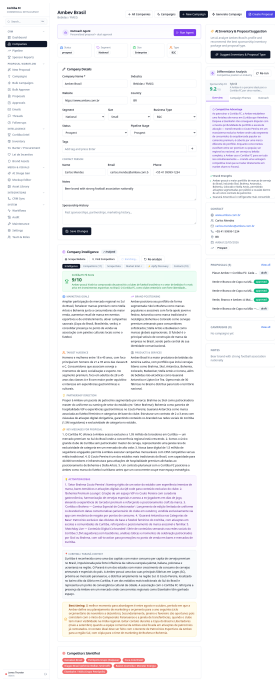

BUG-11

P0

/companies/{id} — Contacts tab

Hunter.io / Apollo contacts cannot be saved to the database

The Contacts tab runs Hunter.io and Apollo and returns results (10 contacts confirmed for Ambev). However, there is no 'Add', 'Save', or 'Import' button. Contacts are visible but cannot be persisted — data is lost when the user leaves the page. Fix: Add a checkbox per result + 'Add Selected' and 'Add All' buttons. Auto-fill name, title, and email. Deduplicate by email address. Effort: 3h.

BUG-11: 10 Hunter.io contacts found — no Add or Save button anywhere

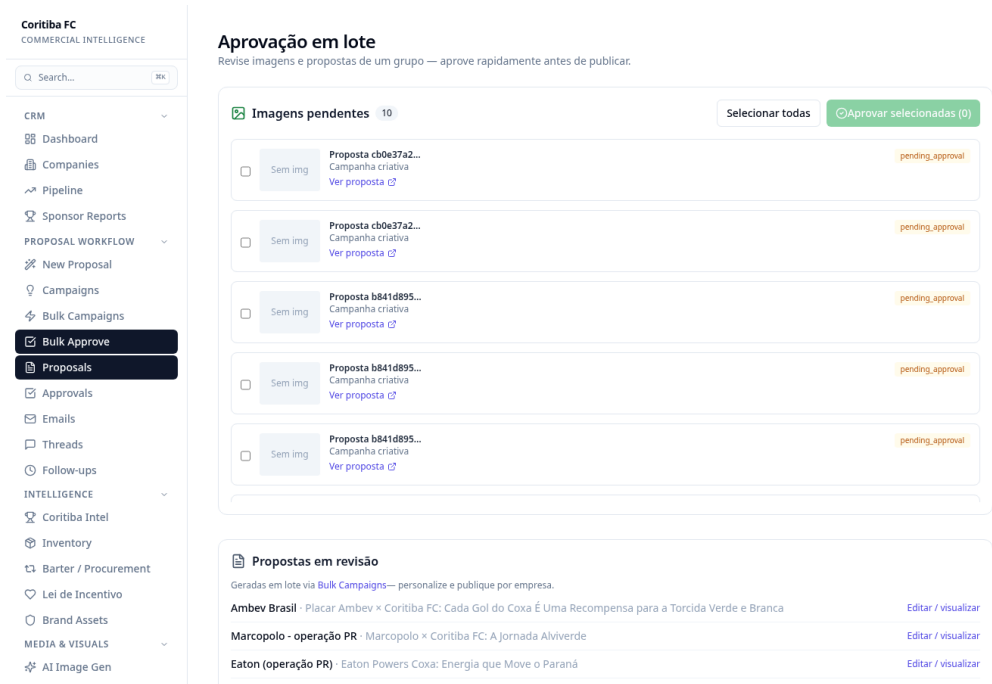

BUG-IMAGES

P0

/proposals — Bulk Approve

Image prompt management: add easy creation, sort/filter by campaign, proposal, company

The bulk approval page shows all proposals with 'Sem img' placeholders — images cannot be reviewed before approving. The core issue is there is no structured way to create, view, or manage AI-generated images across the platform. What's needed: A dedicated image workspace where users can write and submit a prompt per creative, view all generated images, and filter/sort the full image library by company, campaign, or proposal. Fix must also unblock the 28 stuck generation jobs. Fix: Prompt-based image creation UI + image library with filters. Effort: 5h.

BUG-IMAGES: Bulk Approve showing 'Sem img' placeholders — no image management tools

BUG-15

P0

/proposals/{id}/view

Sponsor landing page — admin sidebar exposed, no CTA button

The public /view page (sent to sponsors via email) shows the full internal admin sidebar. Additionally, there is no CTA button for the sponsor to take any action. Fix: Render /view as an isolated public route with no admin layout. Add a prominent CTA block: 'I'm Interested', 'Schedule a Meeting', or contact form. Effort: 4h.

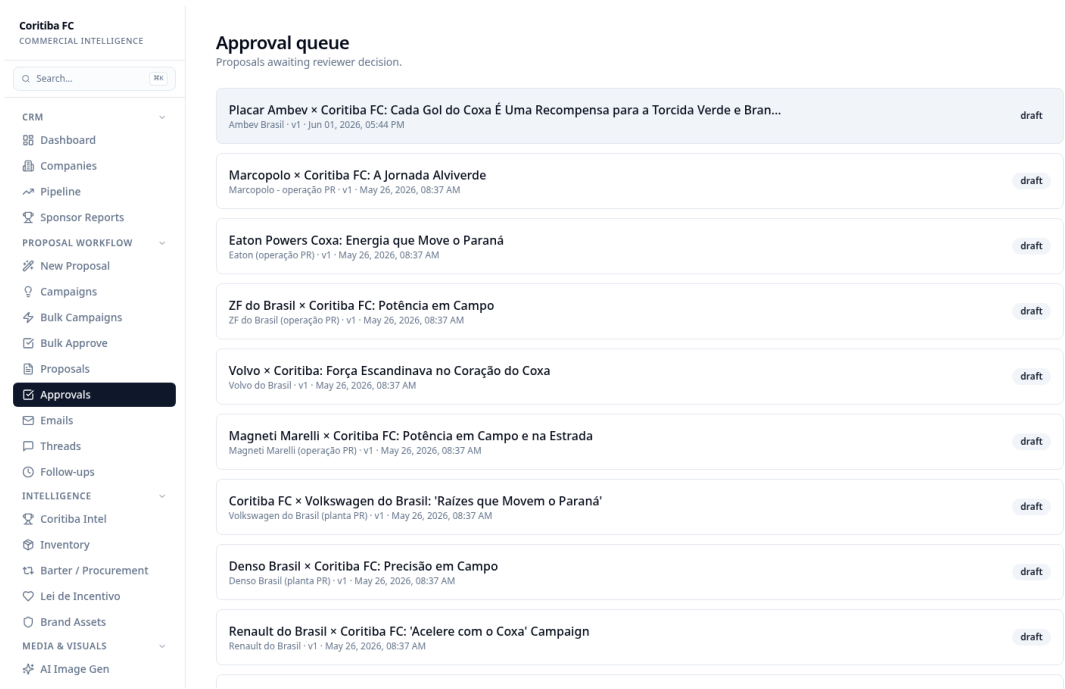

BUG-15: Sponsor landing page — admin sidebar visible, no CTA

SECTION 3 — HIGH-IMPACT BUGS [P1]

BUG-04P1/approvals

Approvals page is completely empty — and needs sorting/filtering by type and stage
The /approvals page shows no items even though proposals, campaigns, and emails exist. Likely a query or permissions issue — content is not being enqueued for approval. Additional requirement: Once fixed, the page must be filterable and sortable by content type (proposal, campaign, email) and by stage (draft, pending, sent). Fix: Debug the approvals query and add filter/sort controls. Effort: 5h.

BUG-04: /approvals — empty page

BUG-06P1/pipeline, /crm-sync

Pipedrive CRM: 0 synced, 35 pending — integration broken
35 companies are pending sync and 0 have been synced to Pipedrive. The integration is broken or misconfigured — the pipeline board does not reflect real deal state. Fix: Verify the Pipedrive API token, map company fields correctly, force a full sync. Effort: 4h.

Page 13

Prepared by Perplexity Computer

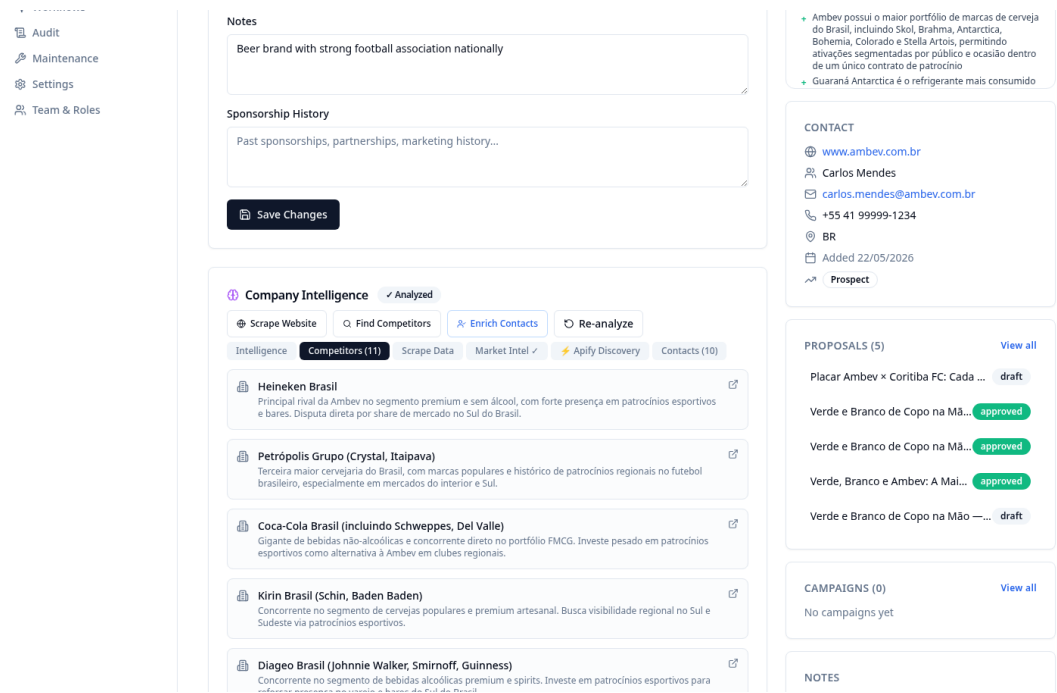

BUG-12

P1

/companies/{id} — Competitors tab

Competitors cannot be added to the company database

The Competitors tab lists identified competitors but has no 'Add to DB' button. There is no way to turn a found competitor into a prospectable company record. Fix: Add an 'Add to DB' button per row, pre-filling company name, website, and industry. Effort: 3h.

BUG-12: Competitors tab — no 'Add to Database' action

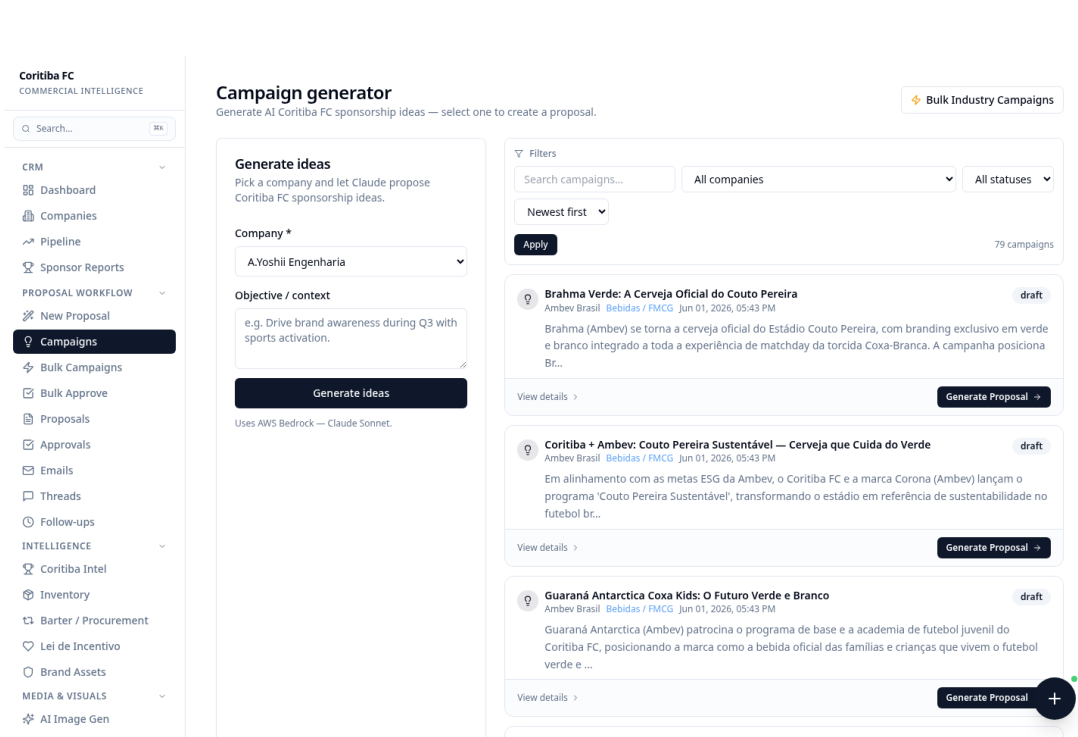

BUG-14

P1

/campaigns

Campaign company selector has no search — 300+ companies to scroll

The company selector dropdown in campaign creation has no search input. With 300+ companies, finding the right one requires manual scrolling. Fix: Add autocomplete search (same pattern already used in the proposal wizard). Effort: 1h.

BUG-14: Campaign — company dropdown with no search

SECTION 4 — MEDIUM BUGS [P2]

BUG-13 P2 /companies/{id}

Industry/category not editable inline — needs auto-labeling via data enrichment

The industry/category field requires opening a full edit form to change — no inline edit. With 300+ companies needing consistent Portuguese labels, this is a maintenance bottleneck. Additional requirement: The data enrichment module should automatically detect and label the industry for each company — reducing the need for manual editing entirely. Fix: Add click-to-edit inline on the category chip. Trigger auto-label from enrichment on company creation. Effort: 3h.

Sponsorship Fit

hybrid

9.2/10

A Ambev é o parceiro ideal para o Coritiba FC por cinco razões...

Overview

Campaign Themes

Outreach

🔍 Competitive Advantage

Ao patrocinar o Coritiba FC, a Ambev estabelece uma fortaleza de marca em Curitiba que Heineken, Itaipava e Eisenbahn não conseguem disputar com a mesma profundidade de portfólio e escala de ativação — transformando o Couto Pereira em um ecossistema exclusivo Ambev onde cada segmento de consumidor, da arquibancada popular ao camarote premium, é coberto por uma marca diferente do portfólio. Enquanto concorrentes escolhem entre ser premium ou popular, ser regional ou nacional, ser cerveja ou bebida completa, a Ambev usa o Coritiba FC para ser tudo isso simultaneamente — criando uma vantagem competitiva local que se traduz diretamente em market share no Paraná.

➡ Brand Strengths

BUG-13: Company detail — industry field has no inline editing

SECTION 5 — USER FLOW MAPPING

Sponsorship Proposal — End-to-End Flow

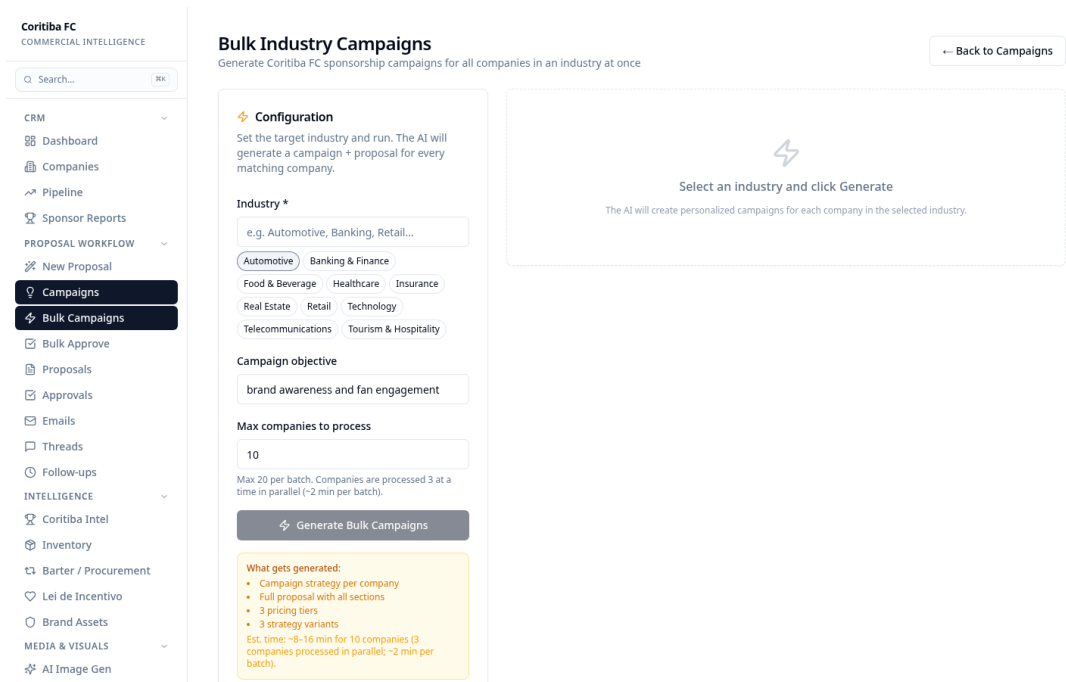

Step	Action	Current State	Bug
	Identify target company	OK — search in /companies	-
	Enrich company data	Partial — Contacts tab: no Save	BUG-11
	Review competitors	Partial — no Add to DB	BUG-12
	Create marketing campaign	OK — but company selector: no search	BUG-14
	Build proposal (wizard)	OK	-
	Generate images/creatives	FAILS — no prompt preview, 28 stuck	BUG-08
	Review / approve content	FAILS — approvals page empty	BUG-04
	Edit proposal content	FAILS — Edit button wrong route	BUG-01
	Send email to sponsor	FAILS — no link, [Nome] literal	BUG-09/10
	Sponsor views proposal	FAILS — admin sidebar + no CTA	BUG-15

6 of 10 steps fail. The platform cannot complete a sponsorship send end-to-end.

SECTION 6 — FEATURE REQUESTS

FR-01 Bulk Proposals — Individual Company Search + Personalized Emails

In the Bulk Proposals module: (1) search for companies individually by name, or search an industry and get a list of matching companies to select from — pick all or cherry-pick; (2) generate a unique personalized proposal per company; (3) generate a unique email per contact within each company (3 contacts = 3 different emails); (4) Tinder-style swipe/approve/reject UI to review each email and proposal individually before bulk dispatch.

FR-01: Current Bulk Campaigns form

FR-02 Team Sender Profile Database

Create a sender profile table for the 5-10 member sponsorship team: name, title, email, phone, photo, LinkedIn, HTML signature. Assign each member to specific companies/contacts. At send time, auto-select the correct sender. Replaces the broken [Nome] placeholder with real dynamic injection: {{sender.name}}, {{sender.title}}, {{sender.phone}}.

FR-02: Current Team page — base to expand

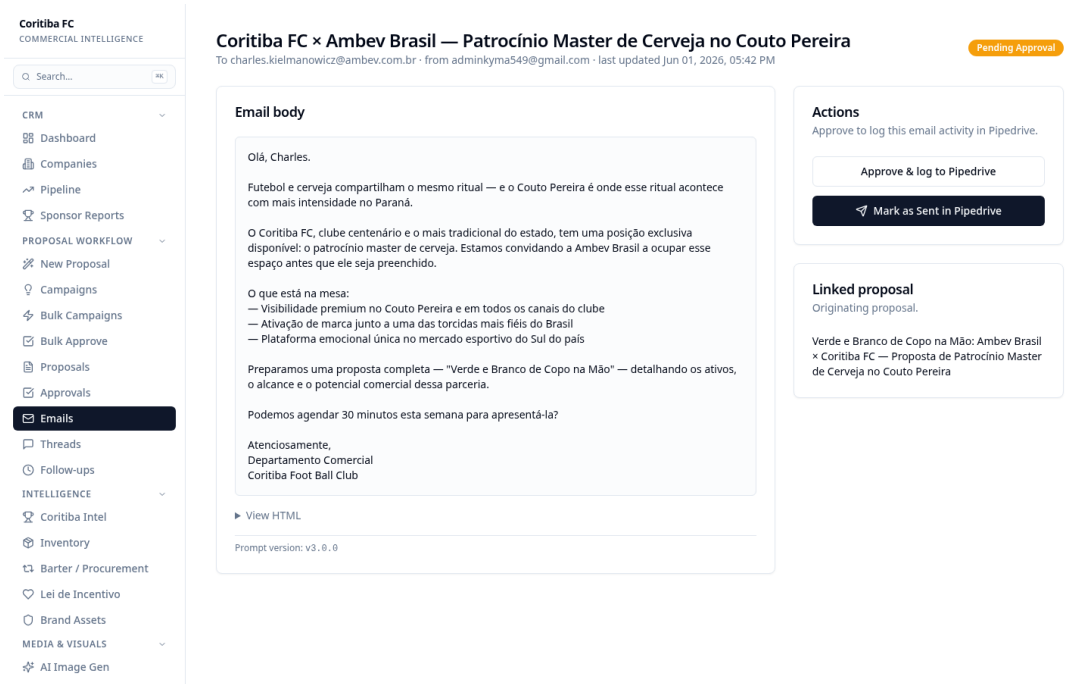

Confidential — Internal Use Only

Page 19

Prepared by Perplexity Computer

FR-03 Email & Proposal Templates with Placeholder Variables

(1) Visual email editor with {{placeholders}} (recipient name, company, sender, package); (2) templates by proposal type (sponsorship, barter, lei de incentivo); (3) real-data preview before sending; (4) mandatory CTA block with 'View Proposal' link; (5) embedded images in email body. All emails must function as visual, compelling sales pitches — not plain text.

FR-03: Current email — no CTA, no images, no link

FR-04 Sponsor Landing Page — Full Redesign

The /proposals/{id}/view page is the product delivered to the sponsor. It must be redesigned as a standalone public page: (1) remove admin sidebar completely; (2) hero with sponsor logo + Coritiba FC branding; (3) sponsorship asset blocks with photo, description, value; (4) marketing campaigns section with creative previews; (5) CTA buttons: 'I'm Interested', 'Schedule a Meeting', 'See All Packages'; (6) lead capture form; (7) downloadable PDF option.

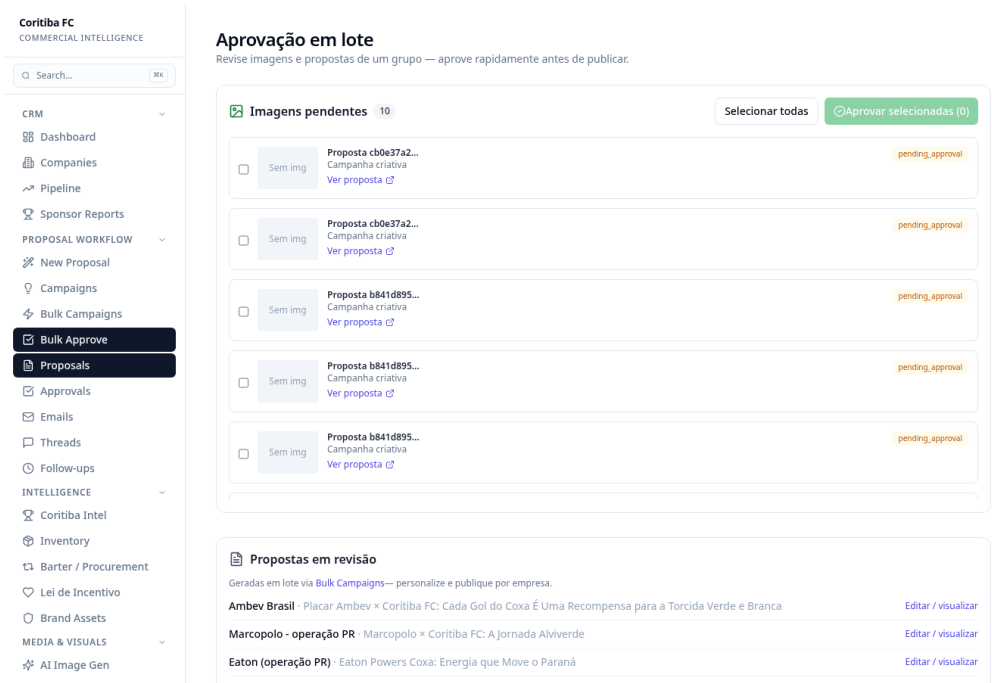

FR-04: Current /view page — admin sidebar visible, no CTA

FR-05

Tinder-Style Approval UI

Replace the bulk-approve page with a card-by-card review flow: (1) one item at a time — full screen; (2) Approve (green) / Reject (red) / Edit (yellow) actions; (3) progress bar: X/Total reviewed; (4) separate queues for campaigns, emails, and proposal elements; (5) applies to all AI-generated content before any send. Also apply this flow when choosing campaigns, inventory items, and proposal elements in bulk proposal builds.

FR-05: Current Bulk Approve — no images, no Tinder UI

FR-06

Automated Company Data Enrichment

When a company is added or manually triggered: (1) auto-fetch logo; (2) LinkedIn profile; (3) social media presence (IG, FB, X, YouTube); (4) Facebook Ads Library active ads; (5) Google Ad Transparency; (6) current sponsorships; (7) sponsorship potential score (1-10); (8) auto-detect and label industry; (9) auto-detect competitors + option to add to DB.
